

International Network for Terrestrial Research and Monitoring in the Arctic

Station Managers' Forum

Dear Susan Holden Martin/Mars Arctic Research Station,

First a very warm welcome to the INTERACT network of field stations.

A central element of the INTERACT project is the Station Managers' Forum – a platform for information exchange between participating research infrastructures and associated partners and organisations.

Station Managers' Forum meetings are held twice a year at a consortium partner institution or field station. The Station Managers' Forum meetings are open to external partners (non-consortium members and Observer Stations) and will be used to discuss issues related to station management and administration, and to share information between field stations, associated partners, local communities and other participants.

The Station Managers' Forum has produced a catalogue of field stations in the INTERACT network.
<http://www.eu-interact.org/station-managers-forum/report-deliverables/station-catalogue/>

This catalogue presents text descriptions and facts for all stations in the INTERACT network (also Observer Stations). The information is also used for station presentations on the INTERACT website and in a web-based version, hosted by the Arctic Portal, both of which can be regularly updated.

We would therefore kindly ask you to fill in attached templates and send these to us together at your earliest convenience. Please also provide us with a good selection of photos (10-15) of the station, infrastructures, landscape and species.

We will then make sure that the information is posted on the web (INTERACT and Arctic Portal sites) and in possible new editions of the printed catalogue.

Should you have any questions, you are most welcome to contact the INTERACT Station Managers' Forum and we will do our best to assist you:

Elmer Topp-Jørgensen
